2010 Promise and Reality award finalists

Oct 29, 2010
This article appears in the issue November/December 2010, [Vol 19, Issue 10]

eTouch SamePage—scalable and dynamic enterprise wiki that enables its users to foster collaboration, manage valuable company knowledge and streamline decision making in a secure, well supported environment.

Expert System Cogito Platform—software that searches, discovers, classifies, extracts and interprets text information generated automatically through Expert System, allowing for a faster search with a high degree of precision, helping to streamline the search process as a whole.

iCONECT Development iCONECTnXT—enables reviewers to analyze multilingual documents using concept searching and clustering, sort e-mail by filtering forwards or replies, assign the same review designation with one click and verify review accuracy with detailed reports.

Inmagic Presto Social Knowledge Networks (SKN)—helps business users access and search relevant content and community insight across enterprise silos to create an environment focused on addressing high-value business processes and objectives.

kCura Relativity and Method—a Web-based e-discovery platform servicing the analysis, review and production stages of the electronic discovery reference model (EDRM) document review and powering kCura's legal hold management solution, Method, which is a workflow and notification system designed to manage the legal hold and risk assessment processes.

Knowledge Plaza Business-to-Business KM Platform—a software-as-a-service collaborative platform for knowledge professionals to collect, enrich and package any type of information and share it with internal and external communities that need access to it.

Kofax Capture—engineered to be compatible with virtually any scanner or other capture device, as well as content and document management systems, workflow applications and databases for consistent capture, indexing and validation of vital information.

MarkLogic MarkLogic Server—a purpose-built database for leveraging unstructured information at Internet scale, enabling customers in industries including media, government and financial services to develop and deploy information applications at a fraction of the time and cost it takes with conventional approaches.

SDL's Structured Content Technologies Component Content Management (CCM) and Dynamic Publishing software—streamlines the process and cost associated with creating, managing and delivering technical documentation to global customers through out-of-the-box software solutions that allow a company to begin working with structured content almost immediately, with further support from its professional services organization.

Servigistics Service Lifecycle Management (SLM)—solutions address all the key post-sale service areas including service parts planning and pricing, field service management, service logistics, warranty management, service knowledge and content management.

SYSPRO SYSPRO 6.1—enables mid-market manufacturers and distributors to gain all the benefits of leading-edge ERP software even though they may possess limited resources and skills.

Thomson Reuters Reuters Insider—provides video content in a timely and accurate manner—on a highly personalized and customized level—to industry professionals with very sophisticated requirements within the financial services industry.

Vivisimo Velocity—an "Information Optimization Platform" that unifies access to secure business repositories through an intuitive user interface presenting relevant information and enabling knowledge sharing across an enterprise.

ZL Technologies Unified Archive—a business data knowledge management platform designed to integrate enterprise search and business intelligence by creating a single repository for all data sources within an organization, including files, e-mails, legacy data and social media content.

ZyLAB North America Information Management Platform—provides an optimal framework for six specialized, all-in-one system deployments: eDiscovery & Legal Production, Compliance & Litigation Readiness, Investigations & Law Enforcement, Communications & Intelligence (COMINT), Print & Digital Media Archiving, and Enterprise Information Management.
