Exchange Server Archiving and Compliance

Silver Award:

ZipLip Unified Email Archival Suite Version 5.2

Touted as the "one to watch," the Silver Award for SearchExchange.com's Archiving and Compliance category goes to ZipLip Unified Email Archival Suite Version 5.2.

Judges gave ZipLip Inc.'s Unified Email Archival Suite high marks for performance, value and functionality. They specifically pointed to its capabilities for built-in email encryption and random message sampling that clearly delineate complex legal regulations in a technologically meaningful way.

Unified Email Archival Suite runs on Exchange Server, Lotus Notes and mixed messaging platforms. Version 5.2 expands on a variety of the product's earlier electronic records search capacity and offers several new compliance features, among them pre- and post-email review to prevent assigned reviewers from reviewing their own email and address tagging of items for special handling during legal discovery.

Pricing: There is a one-time perpetual software license based on the modules selected. Annual maintenance starts at 20% of the software price. List price for basic archiving or mailbox management for 1,000 mailboxes starts at $51,000.
