MILPITAS, Calif., Sept. 20, 2018 (GLOBE NEWSWIRE) -- <u>**ZL Technologies, Inc.**</u> (ZL), a leader in information governance, provides a cloud-based solution to simultaneously address eDiscovery, compliance, records management, analytics and privacy, unified under one platform. This unified management layer solves the difficult task of managing across the various governance silos. In addition, the platform offers enterprise-wide information management that scales to extreme data volumes, reaching many petabytes for the world's largest enterprises.

The solution offers the same award-winning capabilities on all modes of deployment, including cloud, hybrid cloud, and on-premise, often with mixed deployments to satisfy complex international regulations. ZL's cloud customers span across major industries, including financial services, pharmaceutical, healthcare, manufacturing, and government.

Reflecting the global presence of its enterprise customers, ZL's cloud addresses the need for flexibility in data location and management across international boundaries, to satisfy a checkerboard of regulations while minimizing costs and maximizing data control.

Under a subscription or SaaS model, customers are offered a complete menu of managed services, such as:

- Migrations services to move very large on-premise data sets to the cloud
- Elastic scaling to accommodate large increases in data volumes cost-effectively
- Complete management of updates
- Specialized managed services such as data exports, eDiscovery searches, etc.
- 24/7 support

In addition, ZL offers migration services to enable a seamless transition for customers seeking to move to the cloud, including files cleanup to reduce data sets prior to cloud

migration. For data migration, ZL offers 99.95 percent data integrity, exceeding industry norms of 95 to 97 percent, a difference which is critical to compliance, legal and risk departments.

"Because of highly complex data regulations such as GDPR which cut across regions, states, and countries, companies are faced with a jigsaw puzzle of piecing together disparate policies for different types of data," said ZL Technologies CEO, Kon Leong. "Now, more than ever, organizations need a unified management layer to enforce governance policies in a flexible and consistent manner."

About ZL Technologies, Inc.
ZL Technologies' centralized information governance platform enables organizations to manage all enterprise content and satisfy corporate needs for data privacy, file analytics, eDiscovery, records management, and FINRA and GDPR compliance. ZL's unique differentiator is its unified architecture which consolidates all applications and billions of documents under one platform, thus eliminating today's fractured data silos which significantly raise operating costs and increase legal risk. With a proven track record of serving Global 500 customers, ZL has emerged as a technology leader in harnessing big data for strategic advantage. For more information, please visit www.zlti.com
